

RESEARCH ANALYST

Suncorp Valuations is an expanding full service appraisal and valuation consulting firm with offices in Canada and the U.S. We appraise land, buildings, machinery and other related equipment for financing, litigation support, mergers and acquisitions, financial reporting, and insurance purposes.

We are seeking an individual to fill the position of Research Analyst in our Real Property group in our Saskatoon, Saskatchewan office. This position will be responsible for completing research and administrative functions to support appraisal services on a variety of market value and/or costing appraisal assignments. This could include report production for commercial/residential, gathering information on comparable sales, updating of database information, and other duties supporting the timely completion of commercial/residential appraisals. Ideally, this position is for an individual that has a keen interest in real estate.

The successful individual will possess:

- Minimum two years of work experience.

The successful individual will have the following skill set:

- Proven ability to perform independent research and analysis (preferred).
- Computer skills, including advanced knowledge of all Microsoft Office programs, specifically Excel.
- Ability to work accurately and proficiently with numbers.
- Excellent oral and written communication skills.
- Highly motivated.
- Team oriented.
- Proven organizational/time management skills.
- Strong customer service focus.

Suncorp Valuations offers a competitive compensation package which includes benefits, transit allowance, profit share, and RRSP program.

If you are interested in becoming a team member of our expanding and dynamic organization, please submit your resume with references, cover letter, and salary expectations **before** October 22nd, 2010 to:
